Education

New York University

New York, NY

B.S. MECHANICAL ENGINEERING, MAJOR GPA: 3.51/4.00, CUMULATIVE GPA: 3.27/4.0

Aug 2016 - May 2020

- **Dr. Morris Young Outstanding Project Award:** "WOOMBA", Spring 2020 ; **Dean's Award:** "Parking Lot Project", Spring 2020
- **Organizations:** Othmer Hall Council, ASME, Society of Asian Scientists and Engineers

Experience

Dash 7 Design - Anish Kapoor Sculpture

New York, NY

FIELD ENGINEER

Jul 2020 - current

- Streamlining weld remediation of a 20 ft tall, 40 ton, stainless steel bean sculpture by creating and managing multiple working progress sheets in MS Excel, decreasing project lead times by up to 50%
- Interfacing with sub-contracted engineers to design load transfer props utilized in cable suspending the sculpture
- Producing and managing control sheets and DXF files for CNC fabrication of the load transfer props (est cost of \$16,0000)
- Assisting engineers and welders on-site by preparing remediation material using angle grinders and portable band saw

WOOMBA

New York, NY

LEAD DESIGN ENGINEER

Aug 2019 - May 2020

- Designed and managed the framework of a remotely operated trash-removal water vehicle (ROV) using SolidWorks
- Reduced empty weight of ROV by 25% and optimized material selection using ANSYS Workbench static structural simulations
- Optimized layout of conveyor belt sub-assembly, payload bin, and electronics to improve dynamic stability of ROV by 70%
- Developed 2D drawings (manufacturing and information) and worked with machinist to water jet cut parts

NYU Dibner IT

New York, NY

SPECIALIZED DESIGN LEAD

Nov 2018 - Apr 2020

- Collaborated with hardware and software engineers to implement a population density tracking system in a library
- Designed and 3D printed housing units for over 500 sonar sensors and 50 Raspberry Pi's with custom PCBs using SolidWorks
- Implemented tamper-proof screws in RPI/PCB case design to secure over \$1000 of hardware and minimize presence
- Drafted floorplans with electrical schematic to reduce installation lead time by 50% using AutoCAD and SolidWorks

MakerBot Industries

New York, NY

MATERIALS AND TEST ENGINEERING INTERN

Sep 2019 - Dec 2019

- Automated a material testing apparatus to double testing speed using an integrated LabVIEW program
- Developed data processing script in R to generate material behavior graphs from imported raw testing data
- Presented material testing data, testing procedures, and material pros/cons to VP of Engineering and senior test engineers

NYU Aerospace - SAE Aero Advanced Class

New York, NY

DESIGN AND MANUFACTURING ENGINEER

Oct 2018 - Apr 2019

- Redesigned wing box and fuselage using SolidWorks Simulations after failed test flight, reducing empty weight by 30%
- Implemented manufacturing standards to rebuild the aircraft in 90 hours, reducing construction time by over 75%
- Reduced stress concentration on center wing box by 60% through static structural analysis in SolidWorks Simulations

Skills

Software SolidWorks, AutoCAD, CATIA v5, KeyShot8, ANSYS Workbench (Structural Analysis), MATLAB, LabVIEW

Processes 2D Drafting/Drawing, GD&T, 3D Printing, Laser Cutting, Waterjet Cutting, CNC, MIG Welding

Research & Development, Developmental Design, Design for Manufacture/Assembly

Misc. Tech. Mac, Windows, BASH, Git, Adobe Creative Suite, Microsoft Office, Raspberry Pi, Arduino

Certifications OSHA 30 Certification
